

Polycarbonate Facades

Sustainable Features of Polycarbonate Daylighting & Facades

This CPD is an introduction to sustainability and design considerations when creating a façade for vertical daylighting and presents the flexibility and freedom in design that architectural polycarbonate glazing systems can offer.

It is suitable for architects, building owners and contractors working on a variety of public and private sector and industrial buildings.

Topics covered include:

- The Benefits of Natural Light
- Polycarbonate - Benefits and Misconceptions
- Applications
- Relevant Regulations
- Façade Design Considerations
- Case Studies
