

The Brett Martin Academy

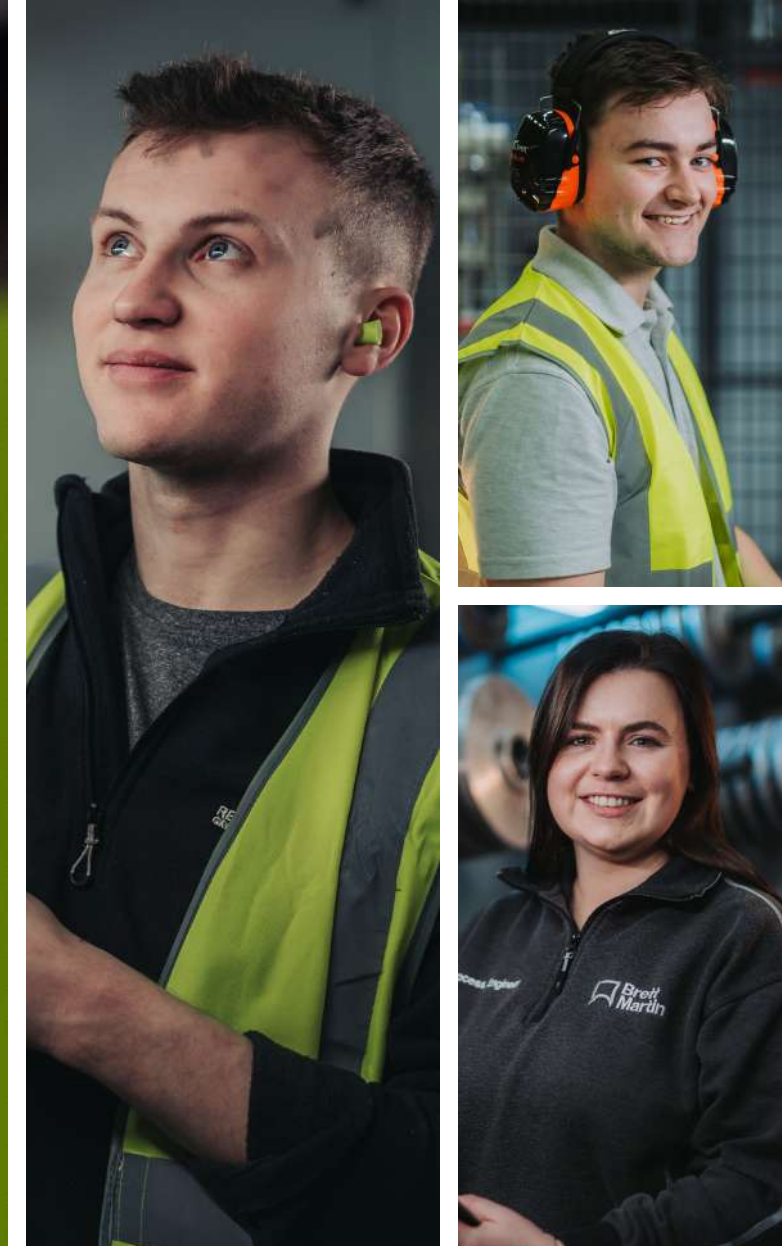

**Apprenticeships
in Engineering**
(Mechanical / Electrical)

Learn, Grow, Achieve

From a young age I wanted to work in engineering and Brett Martin has given me that opportunity. I would highly recommend the Apprenticeship Programme. ”

Perry Gillanders
Maintenance Technician

Why choose the Brett Martin Academy

-  Earn as you learn
-  Achieve academic qualifications
-  Develop technical skills with hands on experience
-  Opportunity of a full time position on completion of your course

After finishing my A-Levels I decided to pursue a career in Engineering. The Brett Martin Apprenticeship Programme combining on the job learning and day release towards an academic qualification, sounded ideal.

On the job learning

For four days of the week my time was spent in the Brett Martin factory in Newtownabbey on the job learning which really suited me. During the first year I spent time moving around each department to gain experience of the large factory and the many products and processes. The rest of the apprenticeship

I spent working as part of the Maintenance Department alongside tradesmen with vast amounts of experience and knowledge.

College and qualifications

During years 1-3 of the programme I studied BTEC Engineering at Level 2 and 3 and completed Level 2 and 3 NVQ. The BTEC covered the theory aspect and the NVQ covered practical aspects of Mechanical and Electrical Engineering. My studies then progressed to NRC Newtownabbey's HNC in Manufacturing Engineering.

This covered more specialised and in-depth subjects which was I was able to apply in work. The HNC was great for helping me better understand electrical and mechanical systems.

Full time member of the team

On completion of my Apprenticeship I was delighted to be offered a full time position as a Maintenance Technician. Two years later I am now working on shift covering breakdowns across the entire site with my shift partner. This role is extremely diverse and results in every day being different and interesting.

Join an established Top 100 Northern Ireland Company

WHAT YOU WILL NEED:

A minimum of 7 GCSE's grade C or above (English, Maths, Science)

We are also interested to hear from applications who have just completed A-levels (English, Maths, Science)
